

ABOUT VITALSTAF

VitalStaf is a technology-enabled healthcare staffing company headquartered in New York, NY supporting hospitals, nursing homes, and post-acute care facilities with credentialed clinicians on demand. Founded by a healthcare industry operator and a former Meta engineer, the company combines deep clinical staffing expertise with serious technology capability, a combination underrepresented in this market. As a SAM-registered small business, VitalStaf is positioned to support federal prime contractors as a subcontractor and to bid on small business set-aside opportunities in healthcare staffing.

PAST PERFORMANCE & OPERATIONAL CAPACITY

VitalStaf is an active subcontractor to a leading healthcare workforce MSP, supporting one of the largest public healthcare systems in the United States. VitalStaf places RNs, LPNs, CNAs, LMSWs, care and case management social workers, behavioral health social workers, and allied health professionals across acute care hospitals, long-term care facilities, ambulatory clinics, emergency departments, and behavioral health settings operating within a structured Vendor Management System (VMS) environment with formal credentialing, compliance, and fill-rate requirements. VitalStaf also serves commercial hospital and post-acute care clients throughout the NY/NJ metro region. Registered with New York State as a Temporary Health Care Services Agency. References available on request.

CORE COMPETENCIES

Technology Platform

Automated shift matching, credentialing workflow, fill-rate analytics

Social Work & Care Management

LMSWs, care and case management social workers, behavioral health social workers

Federal Contracting Ready

SAM-registered, CAGE-coded, small business

DIFFERENTIATORS

- **Substantiated technology.** Production platform performs skills/location/availability-based clinician matching, automated credentialing verification, and fill-rate and time-to-fill analytics reducing administrative burden for prime contractors and facility partners alike.
- **Proven in MSP and VMS environments.** Active subcontractor to a major healthcare workforce MSP, operating within formal Vendor Management System workflows for credentialing, scheduling, compliance reporting, and fill-rate management. Familiar with the operational mechanics federal primes use to manage subcontractor performance.
- **Platform-managed compliance.** The VitalStaf platform automates the credentialing lifecycle: background check management, credential validation, continuing education tracking with CEU delivery, scheduled health screenings, and real-time license expiration alerts. Compliance is enforced at the system level reducing risk.
- **Small business agility.** Lean operating structure delivers responsive contracting, rapid onboarding, and direct executive accountability for partners.

TARGET FEDERAL PARTNERS

VitalStaf is actively pursuing small business subcontracting partnerships with established federal prime contractors including SDVOSB, VOSB, and 8(a) primes supporting healthcare staffing IDIQs, BPAs, and task orders across clinical staffing, social work, behavioral health, and care coordination at federal facilities throughout the Northeast. VitalStaf also bids on small business set-aside opportunities matching its NAICS codes and clinical service areas.
